

DST SOFTWARE

INSTALLATION

Download the demo DST software

Extract the zipped files to a temporary folder

Run “Setup.exe” to install the program

Download the registration files.

**Extract these files to C:\Weatherford Test Analysis\ATMS
2000 Office.**

These files will override files that already exist.

Double click on the Icon that has been added to your desktop

Copy and paste this registration number 7555A5D5854575A5

The expiration date should be 9/29/2011

Select the units as shown

The screenshot shows the 'Preferences' dialog box with the 'Units' tab selected. The dialog is titled 'Preferences' and has four tabs: 'PTGraph', 'Units', 'Panels', and 'General'. The 'Units' tab is active and contains the following settings:

- Units Setup:**
 - Pressure: psig
 - Gas Flow Rate: Mcf/d
 - Temperature: deg F
 - Oil / Water Flow Rate: bbl/d
 - Depth: ft
 - Weight: lb
 - Diameter: inches
 - Mud Weight: lb/gal
 - Volume: bbl
 - Mud Viscosity: sec/qt
 - Atmospheric Pressure Correction: 14.4 psig
- Analysis Units Setup:**
 - Radius of Investigation: ft
 - Viscosity: cp
 - Total System Compress: 1/psi
- Mud Info Units Setup:**
 - Water Loss: in³
- PAS Only:**
 - Representative Gradient: psi/ft

At the bottom of the dialog are three buttons: 'OK', 'Cancel', and 'Apply'.

The program is now ready to use.
